Trees in your neighborhood

Hi Privacy

Hope all is going well with you.

I wanted to check in with you because we may have some resources available to plant some new trees in the area. I recall you mentioning that you'd like to see an increase in the urban canopy in your neighborhood last time we spoke.

So if you can, please send me two or three block segments in your area that could use some more trees.

Thanks! Looking forward to hearing from you.

Absolutely! Yes I read about the new forest officer hire and meant to reach out about maybe having her come to our neighborhood council meeting.

Very glad you got to me first and I'll look around my neighborhood. We definitely need it.

Thanks!

If you can get this to me in the next week or so, that would be great.

I would need segments, so for example, something like (X Street, between Y Ave and Z Blvd.)

Thanks, and looking forward to hearing from you.

Hi George,

Hope I'm not too late on this. It's been a busy couple weeks for me, but we discussed this at our HSDNC outreach meeting on Monday 10/21 and had a couple ideas and questions:

First - and I should have asked this previously - what do you require for tree planting? Does there need to be an existing planter or is it possible to dig up concrete from the sidewalk in order to plant a tree? If we are only suggesting areas in Hollywood with exiting planters, that will be extremely limiting so I hope it is the latter situation.

Second - do the freeway entrances/exits count as areas for tree planting and other landscaping/beautification? The entrances and exits at Western/Fountain, Western/Lexington, Santa Monica/Serrano are in desperate need of maintenance and we should be doing as much as we can right now to sequester emissions from this highly trafficked area.

Suggested planting locations: I noticed that along Western just south of Lexington on the east side of the street there is plenty of room for trees. Also on Western between Lexington and the 101 on the west side of the street.

I'll see about more locations this weekend.

Thanks again,
Ben

Hi Ben,

Curb cuts would be made to existing the existing hardscape where needed.

Freeway entrances do not count as they are maintained by the State and not the City.

We have submitted locations, but I will try to include the two you mentioned in your last e-mail to the list.

Keep in mind that these are just proposed locations, and LASAN will make a determination on what actually goes in.

Will keep you posted.

Best,
George

Wonderful, thank you!

Do you know who we (HSDNC) could contact at the state level about freeway entrance landscaping?

I believe the Toluca NC was working on a similar project I wonder where they're at and how they planned it...
